

Smart in sensing

Localized production of WIKAI Kazakhstan

World leader in pressure, temperature, level and flow measurement

79 years of experience, competence, innovative strength.

> 11 000 employees worldwide.

WIKA Kazakhstan has been operating since 2002, with support offices in Almaty and Astana.

Production and service facility in Atyrau, focused on boosting local content (CT-KZ).

WIKA Uzbekistan has been operating since 2022.

Sustainable development in Azerbaijan, Georgia, Armenia, Turkmenistan, Mongolia, Kyrgyzstan, and Tajikistan.

WIKA KAZAKHSTAN
WIKA CIS

Production facility in Atyrau

Stainless steel and Hastelloy pressure gauges:

- Model 23x.x0.100/160, PG28;
- Model PG23LT for ambient temperatures down to -70 °C;
- Measuring ranges from -1 ... 1000 bar.

Temperature sensors:

- Resistance thermometers;
- Thermocouples;
- Fabricated thermowells.

Diaphragm seal systems (DSS):

- DSS with pressure gauges, transmitters and pressure switches;
- DSS with third-party manufacturers;
- Special materials and coatings (Hastelloy, Monel, Gold, PFA).

Development plan:

- Solid turned thermowells allow electronic thermometers to be used in the harshest conditions;
- Orifice devices for flow measurement using the differential pressure method;
- Bypass level indicators;
- Own calibration / verification laboratory.

Production support:

- Partnership with major oil and gas companies: NCOC, KPO, TCO;
- Reliable orders from key oil and gas companies are critical to maintaining productive local operations.

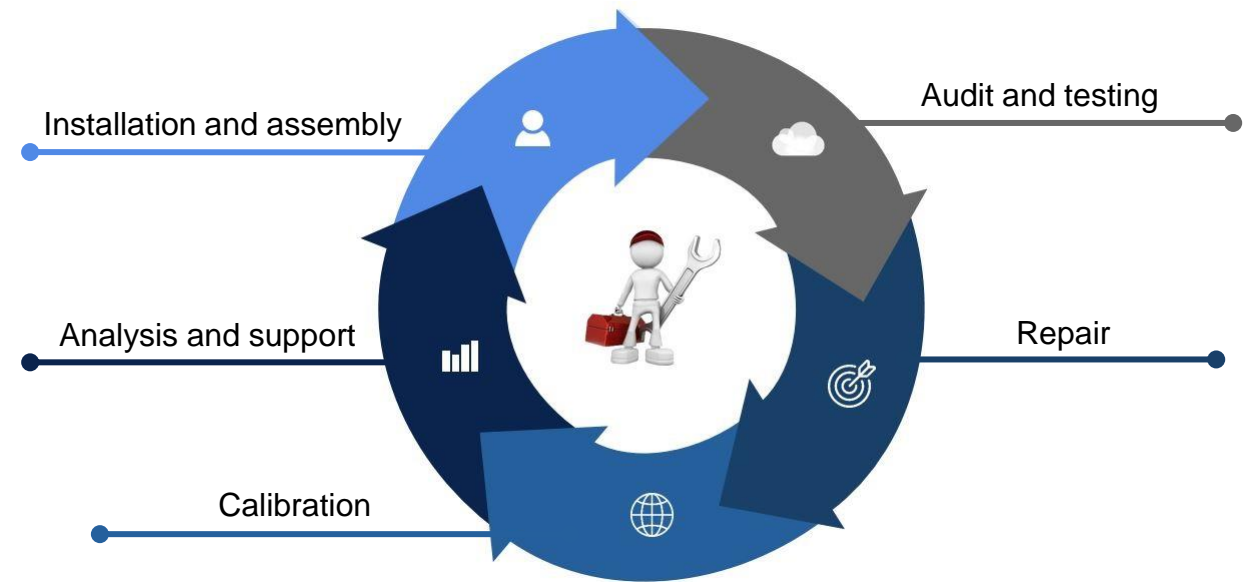

Local service

Types of services:

- Replacement of DSS with pressure transmitters / switches;
- Replacement of DSS with mechanical measuring instruments;
- Repair of faulty components;
- Additional equipment to existing systems with diaphragm seal;
- Instruments calibration for pressure and temperature.

The advantage of replacing diaphragm seal:

- The price of the converter within the framework of replacement is not equal to the price at which the delivery was made;
- The delivery time of a working assembly is reduced from 7-8 to 2-3 weeks.

Cooperation with Educational Institutions

Atyrau University of Oil and Gas named after Safi Utebayev

Industrial internships for students
Dual education programs.

Formation of an external talent pool in cooperation with the university's alumni club.

Guest lectures by WIKAI specialists.

Career opportunities for graduates, supporting the professional growth of talented young specialists in the Republic of Kazakhstan.

ATYRAU OIL AND
GAS UNIVERSITY

S. Mukashev Atyrau Polytechnic College

Signing of a memorandum of cooperation.

Training of skilled workers for production needs.

Dual education programs.

Summer internships.
